## (54) METHOD AND DEVICE FOR EVALUATING IONIC CURRENT SENSOR SIGNAL OF INTERNAL COMBUSTION ENGINE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method and a device for measuring and controlling operation data of an internal combustion engine so as to optimize a combustion process.

SOLUTION: In this method, at least one parameter characterized by the combustion start and/or the combustion quality is detected by processing of a signal. In this device, a means is provided for detecting at least one parameter characterized by the combustion start and/or the combustion quality by processing of a signal.
